Gor smior Whittaker i solined to appoint a senator wo file that vacancy because he considered that a senator and authorized to appoint. But this we are menred by men who were in close relations with him at the time was not so. He did not refree to appoint and was not saked to appoint. Happenply did not consider the question. The flaints to elect at the special session of May, 18..., appears to hive been caused by a division of the seen the democrate on the question of tendering I elazan. Smit. At that time there was no qualitate States have to regulate the manuer of hosting elections for sensiors, and the opponews of Smith refused to go into a joint cor-version. It was a prevent such proceedings that the act of 180, was passed. From the c.r. cuparances which occurred during the sessions of 1800 and 1800 and which had their parallel in other states, we may see perhaps the intention of search of 1860, as well as its cause. The act wa intended to prevent the failure to elect ed a d prescribing the mode of election. It has that 's to meet in wint passembly and take at least one vote each day will a senator is elected. The tarrif reform league in Boston provides weekly lectures in the Did So th most oug house, which age well attend a The treum, reform club of Brook in also has frequot becomes on the subject, with attraction in the interest and interest. These lectures are not delivered by oblicates nor theorists done, but many of the are 1, manufacturers who are now among the most carnest advocates of tard reform Western tradufacturers also are furms sing coutributions to the discussion, and they agree congestion is more foreign commerce, and what is waited in order to get more foreign com-nerco is more commercial freedom. Or a bif the most interesting and valerable of Hese lectures was lelivered in Brook 5.1 by Mr.

J. B. Sargen, answeiling in the negative the question. Do our infunt industries deed pro-tection? Mr. Sargent says that sefore the Revolution the American colonies experted bar iron to England, made with charcoa. When England inscovered that soft coal could be con-verted into colle, we put on protective lattes in slead of more ring the soft coals of Maryland stead on more ring in each coast of dayland and Virgin is, and for a century we have been trying to proceed in on as "in infinit industry. He courts the theat that in the less need profection in the contrary, they need it less that any other they have an oper field, no competition and an unfirthed market. A very important element in each cases, as Mr. Sargent points out, "Is a wide furthet—became cheapness of manufacture is very much governed by The state came near being without any and great fluctuations in demand wouled? which would be opened by a liberal teruff, and the energy, the invention, the aplatude for business, it e trained shrewdness and self-rell ance of the American would have nothing to

Spain and Bussia, all high tariff countries. He describes Le food and locgings of the laborer of southern Europe, says they are we if ed, but in a way we chan American would sours, and that helt housing is miserable. He has observed closely this "par per labor" in its home and at its tasks, and he concludes that it is pauper in its efficiency quite as much as in co-dition. This is a point which the advocates of high term persistently overlook. They estimate the price of thor by the day, not by he plece. It does nor follow that higher rates of wages make a kigher cost for labor. On the contrary, they of en are paid in the manufacture of goods in which the cost of labor, compared with equal quantities and like quality of goods made abroad, is much less. The wages of mon engaged it country than in England, while the amount of money pa 1 for be labor in a ton of hat steel may be less. Mr. Sargent tells of a German manufacturer who had imitated his goods magnaturater who may man innuce he governs an mentity as he could, and who said to him, "Althoug iron is now at a hight partit price in Germany, at it it is hower priced than in the United States the cost of labor to Germany is certainly not over half the cost in the United States, and jet you self tiese goods in termany cheaper than I can posselly make them there." 'I replied to can possitive that it is a possitive to the possitive and interface to the possitive that is evidently slid and understand the labor problem at all. I senatured that on account of our higher tanif or ivor we were at a bad disadvantage in competing with him in Germany, but told him, what is also true, that we overcame our disadvantage in the price of raw materials by getting the work lone at a lower price per piece than he can possibly get it done in Germany with equal finish? "Our workingmen," he added, "do more, earn more, and get more" Our labor, in other words, is the changest because it makes a man of the laborer and is the most efficient. "The purper later of high-tariff continental Ecope may need protection from us, but we do not need protection from it." Mr. Sargent gives an interesting sketch of the rise of free trade in Great Britain from Itip when the urst free trade demonstration was

BEV. DR. BLOCK S LEC UER. - The first lecture I the social science series of 1885 was given by r. Moch before a large and attentive audience. ecture was preceded with music, a solo, by and, sung admirably by Miss Bloch, accoun-ied by Professor Stehlinger Dr. Bloch ha-lis lecture with careful definitions of wealth gan als lecture with careful definitions of wealth and poverty, the former being in the Social economy, the needed incertive to human effort, the latter the dark shadow of misdirected effort, or tranny. He showed width the view of the rest from ancient times until now, and described the various panaceas which fait to reach the foot of the difficulty. He said intemperance is often rather a result of proverty than its prinary cause; for but he poor, alcibed is a templation of the swiftest supply to the body of what soche to be temperad if tood and fuel. He hought quore stress should be placed upon the remedies of the definial causes of poverty than upon attacking results of noverty.

MARRIED. - Last night Mr. James L. McGown. towenan and proof-reader of THE OREGONIAN, was married to Miss Emily Chenoweth, an amirible and intelligent young lady, in every way litted to fill his life with low. It was a very quiet, sensitie sor of a wedding, and the happy rougle will begin housekeeping this week. Two events in a man's life always give a journal opportantly to say good things about him without encouching on propriety. One is his marriage and the cther his death; and just now the local farts congratulate Mr. EcCown and themselves that it is the first-mentioned event. This is a good time to remark that "Min," as he was called when he entered the service of his paper twenty-three pears ago, has worked asthathfully as any man could work to see that a 1 the matter was set and got into the forms straight; and upon his shoulders rests the blame of very few errors—in proportion to the number—a less careful and conscientious nor a whall have been forgiven for making. What makes the mental strain so hard upon a man in his position is that there is just one time to catch an error—no more—and all the work on a morning daily is done unfer pressure, with thousands of readers at lidsure to discover mistakes the next day. The local force hake this occasion to thank and Mis worthy bride all the happiness that their hughlest dreams have conjured up.

DAMAGE SUIT ON TR AL. - The time of the DAMAGE SUIT ON TR AL.—The time of the state circuit court was occupied all day yesterday with the trial of the suit of C. F. Willis against Jacob Cline to 1 cover \$10,000 damages for false imprisonment. Mr. Cline, who is over 70 years, it seems some time since foolishly matried a woman of 30 years. This union of December and May, or more correctly speaking. December and about the latter part of July or first of August, did, pod work well, and the old problem of "What shall a young lassie do will an old man," came up for solution. The woman appears to have though that the best thing to do with the old man was to get rid of him, and so is now engaged in proceeding her third suit for divorce. C. F. Willis was a witness for Mrs. do with the old man was to get rid of him, and so is now engaged in prosecuting her third suit for divorce. C. F. Willis was a witness for Mrs. Cline, and gare some testimony which was intended to reflect on Mr. Cline's character for fidelity. Mr. Cline were out a charge of perjury against Willis, and on a hearing in Justice by bee's court, the case was dismissed. Now Willis seeks to recover damages for alleged talse imprisonment. The aking of testimony was concluded jestenday. Judge Stott and Ed. Mendishall are comised for defendant, while the prosecution is confidered by J. F. Caples and W. S. Reebel.

DEMUREE OVERBULED.—The case of D. P. DESCRIPER OVERRULED.—The case of B. P. Hammond vs. Geo. B. Cleaveland came up in the L. S. Circuit court yesterday for hearing on a demarrer to the complaint. Hammond is a San Francisco creditor of Gleaveland s, whose claim was \$1136 85] A claim of More 15, Grant & Co. 6 for \$308 20 was assigned to Hammond, and Also a claim for \$1648 50 by Greenbaum, Sacks & Freeman. As one of these caums was for 128 than \$500, defendant denurred to the comp mint on the ground that several causes of action had been improperly united herein, and also c aimed that the court had no jurisdiction. The demarter was overrued.

The denurrer was overrued.

STARTING IN WELL.—The contract for excavating for the foundation of the han isome brick block to be erected by M. F. Milkey at the northeast corner of Second and Morrison streets his been let to Alex, Hamilton & Co., and ground will be broken to-day. The excavation for the foundation of a brick building to be erected by Noah Lambert on Firs. street, between Salmon and Main, is well advanced. Contracts will be let for the new Portland Savings bank building early in March. So spring prospects are opening fair for beticklayers and other mechanics interested in building.

PREPARING FOR THE NEW INDIAN SCHOOL The superintendent of the Indian school at Forest Grove has received instructions from the department at We shington to take possession of the ground north of Salem, pear the fair ground, which has been donated to the government for the purpose of constructing a pullting for the Indian school thereon. It is understood that a number of the male students will shortly be set to work clearing the ground preparatory to the work of construction. The work of construction of the hidding will probably be commenced with the apening of spring.
